Lu Niu

PhD Candidate in Physics

Teaching Assistant on Analytical Mechanics

Condensed Matter Theory Group

School of Physics

The University of Sydney

Sydney, New South Wales 2006, Australia

Email: LukeNiu@outlook.com

Web: https://github.com/ConAntares GitHub: https://github.com/ConAntares

Phone: Expected

Personal Informations

Gender: Male

Day of Birth: May 12, 199x

Place of Birth: Huairou District, Beijing, P.R.China **Nationality:** The People's Republic of China

Office: Expected

Research Interests

Quantum Computation:

Quantum circuit.

Ab Initio:

The surface effect of metal nano-particles.

Education

The University of Sydney

Jul. 2019 - Present

PhD of Science in Physics

Subject: Plasmonics

Thesis: Quantum Computation Logic Circuits Realization Based on Plas-

mon Effects.

GPA: Excepted

Supervisor: Catherine Stampfl

University of Science and Technology Beijing

Sep. 2015 - Jun. 2017

MPhil of Science in Physics

Subject: Atom and Molecular Physics

Thesis: Effect of External Field on the IV Characteristics through the Molec-

ular Nano-junction.

GPA: 3.6

Supervisor: Luxia Wang

Expertise and Technical Strengths

Programming: C/C++, Fortran, Python, Julia, Langer Elex Software: C/C++, Fortran, Python, Julia, Langer Elex Linux, Git, TensorFlow, VASP, Octopus

Expertise: Mathematical Analysis, Topology, Algorithms, Machine Learning,

Density Functional Theory, Plasmonics, Molecular Physics,

Quantum Optics, Quantum Computation

Language: Mandarin Chinese (Native), English

Work Experience

University of Science and Technology Beijing

Teaching Assistant on Analytical Mechanics Teaching Assistant on College Physics Spring, 2017 and Spring, 2016 Autumn, 2016 and Autumn, 2015

Research Experience

Effect of External Field on the IV Characteristics through the Molecular Nanojunction

Sep. 2016 - Jun. 2017 @ USTB, Beijing, P.R.China

This research involves molecule physics. we analyzed the steady current between two electrodes under distinct bias voltages, and studied transient current under Gaussian pulse with different widths; we established the physical model of Molecular junction with external fields which could produce coupling with the molecule.

Plasmon-Enhanced Heterogeneous Electron Transfer with Continuous Band Energy Model

Apr. 2016 - Mar. 2017 @ USTB, Beijing, P.R.China

We calculated the Plasmon-Enhanced heterogeneous electron transfer in semiconductor continuous model with the master equation. And simulated the physical model and conducted the scientific calculation.

Molecular Emission Spectrum of Combined System and its Fourier Analysis

Dec. 2015 - Apr. 2016 @ USTB, Beijing, P.R.China

We probed into the emission spectrum of molecular with Fourier analysis. And built the equations set which describes the physical process of the molecule system excitation in the quantization radiation field.

Publications

2018

Lu Niu, Luxia Wang*; Effect of External Field on the I-V Characteristics through the Molecular Nano-junction (in Chinese); Acta Physica Sinica, 67, 027304 (2018).

2017

Dandan Zhao, Lu Niu, Luxia Wang*; Plasmon Enhanced Heterogeneous Electron Transfer with Continuous Band Energy Model; Chemical Physics, 493 (2017) 194-199.

References and Activites

2016

Nov. 14 – Nov.18, Beijing, The 2nd Joint Workshop on Condensed Matter Science, Peking University & IMPRS. @ PKU, Beijing, P.R.China.

Awards and Honors

2016

First-Class Scholarship, University of Science and Technology Beijing.

Updated April 2019
